INTERNSHIP AND COURSES

Nextwave Fronted Developer trainee 2021

- Programming skills involved in this course are Developing a static website
- Designed and programmed dynamic web application with CSS gird and bootstrap technologies
- created an E-commerce website (food items for delivery), it is just like a clone app for Zomato.

CERTIFICATION

IBM certification Jan 2024

As enthusiastic programmer, I completed EDA with R programming from a recognized organization.

Information Technology enabled Services feb 2020

Services provided by information technologies like Internet of things devices are explored Government AP

PROJECTS

Fronted Development of a Web Application github.com/keerthi/repo

- It was a farmer's web application site where we can order item like eggs,vegetables,paddy.wheat, and many more.
- I have gone to the depth of the topics like the styling of the website, margins, borders, color options, background image, view port measurements and many more in Cascading styling sheets.
- In HTML I also covered major elements like Div containers , paragraphs, heading, buttons, onclick, href, li ui options, inserting images, videos and many more attributes
- It was a wonderful experience of making the website , it was designed like a home page, vegetables section, eggs section, fruits section with different cards with prices.
- Tools Used: HTML,CSS and JAVASCRIPT.

TECHNOLOGIES

Languages: HTML, CSS, JAVA SCRIPT, JAVA, PYTHON.

Database Management : SQL, MICROSOFT SQL.

HOBBIES AND INTREST'S

Reading Books:Bhagavad Gita, Ramayanam And Mahabharatham.

Exploring hindu gods and their stories.
